

Airl has such a positive effect on our community and i can not understand how any would even entertain the idea of possibly removing them from broadcasting. I truly believe that nothing good would come of this. I recently found myself sharing the word of God with an alcoholic and it wasn't easy. There was so much hurt in this person's life she was just rejecting God's word. She is one of my co-workers, in my place of business i'm not surrounded by a whole lot of christians but there are some. God had already used me to plant the seed of his salvation. I did what I felt God had asked of me, even so this person just could not fathom the fact that someone loved her so much he died for her, she felt unworthy as we are. Well this coworker was riding with another coworker who was a new believer and every morning she listens to Airl on the way to work through this alcoholic hearing testimonies from the homeless people who found a home at one of the rescue missions she is no longer drinking. From hearing the words from Embrace Marriage she and her husband have reconciled with one another. Just hearing those words she heard all that she had done wrong in her marriage. She now has replaced her stations in her car to all christian music Airl being on the first memory button. There is now one, no actually two less drunk drivers on the streets now. Two because her husband is no longer drinking. There is now two violent drunks off the streets. I know that this is only one of many stories where Airl has had a positive effect on our community, and the violence that is out of hand. God has already been taken out of every thing else and look at where the world is at now all because a small amount of people don't want anything to do with God even though He is there creator. We have made too many mistakes in this world let's not make anymore. Thank you for your time I know it was supposed to be a small comment but when you begin to speak of God nothing small comes of it. God Bless
